iONTM
pure refreshment

an appliance that
replaces all the
bottled water you
could ever drink

clean....

It's all about clean drinking water. ION transforms ordinary tap water with CarbonPlus™, the latest filtration technology that reduces chlorine, taste, odor, lead, cyst, and more. Bad news for contaminants. Good news for you.

After filtering, the exclusive InstaChill™ system instantly chills and dispenses your water. And ION's design ensures your water stays fresh, not stale from a bottle or reservoir.

simple....

Just press a button and enjoy an endless supply of cold, hot or sparkling water.

The CarbonPlus™ filter can produce enough water to replace 8,000 16 oz. bottles.

And changing the filter is simple. Twist to remove in seconds, without any tools... even without turning off the water supply.

Say goodbye to costly UV bulbs in old-fashioned reservoir coolers. With ION, there's just a few ounces of water from the filter to the faucet, in a pressurized, sealed system.

Freshly filtered, instantly chilled ...

Only from ION.

smart....

Using advanced technology ION continuously monitors water temperatures and filter life for maximum performance.

Every ION is equipped with the energy-saving SleepMode™ and even safety features, such as ChildLock™.

Clean. Simple. Smart. ION gives you an endless source of pure refreshment.

InstaChill™

Don't let ION's compact size deceive you. ION delivers more cold water capacity than any other cooler – large or small.

InstaChill gets its incredible cooling capacity from a unique "ice bank" system. Dispense a 7 ounce glass of water every 30 seconds... for an hour... and ION makes sure its 42° F or colder. No other cooler even comes close.

EZChange™

Changing the CarbonPlus filter is a breeze. Twist to remove in just seconds, without any tools ... even without turning off the water supply.

Model 903

- Cold ●
- Hot ●
- Sparkling ●
- Ambient ●

Dimensions (W x D x H)	13" x 17" x 16.1"
(cm)	332 x 432 x 410
Net Weight	37 lbs. (17 kg)
Electrical Supply	120 VAC
Cold Water Capacity	8 GPH

All models available in 120 VAC and 230 VAC 50/60 Hz
Cold Water Capacity based on 70°F inlet water and 41°F outlet, 8 ounce draw/minute.

Standard Features ● ● ● ●
