

ClearWater **POINTOFUSE** drinking water treatment systems, like our next generation KwikRO4 are designed to remove sediment, taste and odour, chlorine that may be present in your water supply and about 98% of the dissolved mineral salts (TDS) as well as microbiological contaminants.

# KwikRO4™

carbon · sediment · reverse osmosis

These systems work extremely well for **both residential and commercial** properties in Bermuda.

The KwikRO4 operates entirely on water pressure, in other words it requires no wiring under normal house pressure conditions *(supplementary booster pumps are periodically required to compensate for low water pressure).*

Water comes in contact with many impurities on its way to your tap — impurities that can produce foul taste and odours that can ruin your enjoyment of foods and beverages and potentially pose risks to your health.

Even if your home is supplied with municipal water it may still contain impurities and dissolved solids.

People buy bottled water as a result of these quality concerns but bottled water is expensive, heavy, awkward and inconvenient.

**ClearWater's "designed for Bermuda" systems produce safe, clean, clear water at a fraction of the cost of bottled water.**

- Save literally hundreds of dollars a year over the high cost of bottled water
- Do your part by reducing plastic in Bermuda's waste stream
- Have "always on" drinking water that's as safe or safer than bottled water — under your counter or throughout your whole house or commercial building

You want your family to drink safe, clean, clear water, but you're tired of lifting, lugging, storing and paying high prices for heavy, awkward water bottles. You've heard the stories about dangerous chemicals used in the production of some water bottles and you know the environmental damage that water bottle production and disposal can cause.

Our "next generation" **KwikRO4™ fits neatly under your counter** so that your drinking water is clean, safe and clear at a fraction of the cost of bottled water. You can "Kick the Bottle" and ClearWater Systems is here to help!
